

ANNOUNCEMENT OF "CIPKEBIP" ANNUAL CONFERENCE on »**Biosynthetic and metabolic engineering in industrial drug and process development**«, 15-16 September 2011, Ljubljana, Slovenia

The main theme of the conference will be design and optimization of industrial (bio)processes for production of small bioactive molecules and intermediates of natural or synthetic origin.

The conference will bring together industrial and academic scientists from a variety of scientific areas such as classical industrial microbiology, synthetic chemistry and bioinformatics as well as novel approaches of biosynthetic engineering, biotransformation, chemobiosynthesis and synthetic biology.

Confirmed speakers:

- **Prof. Ju Chu**, State Key Laboratory of Bioreactor Engineering, East China University of Science and Technology, China
- **Prof. John Cullum**, LB Genetik, University of Kaiserslautern, Germany.
- **Prof. Meijin Guo**, State Key Laboratory of Bioreactor Engineering, East China University of Science and Technology, China
- **Prof. Paul Herron**, Strathclyde Institute of Pharmacy and Biomedical Sciences, University of Strathclyde, UK.
- **Prof. Daslav Hranueli**, Faculty of Food Technology and Biotechnology, University of Zagreb, Croatia.
- **Prof. Iain S. Hunter**, Strathclyde Institute of Pharmacy and Biomedical Sciences, University of Strathclyde, UK.
- **Dr. Steve Kendrew**, Biotica Technology Ltd., UK.
- **Prof. Istvan Molnar**, SW Center for Natural Products Research and Commercialization, University of Arizona, USA.
- **Prof. Dušica Vujaklija**, Laboratory of Molecular Genetics, Ruder Bosković Institute, Croatia.
- **Prof. Radan Spaventi**, Senior Vice President at Galapagos NV, CEO at Galapagos Research Center d.o.o., Croatia
- **Dr. Ming Qiang Zhang**, Vice President and Asia Pacific R&D Site Head at Merck Sharp & Dohme

The preliminary conference program will be posted shortly.
